No. 16 of the Spanish gunboats was sent from the foot of Thirteenth at., yesterday, to an anchorage off the Battery, where she now lies, under the gans of the U.S. steamer Albany. The Isabel de Catohea is hourly expected at this port. Nothing of importance occurred at the rooms of the Cabau Junta yesterday. Quite a crowd loitered around the corridors, many of them expecting tidings from the Triumph, which, it is alleged, is on a mission to destroy the canoneras.

The Rev. G. W. Stewart, Pastor of the Episcopal" Church of our Lord," now worshiping in the hail on the corner of Eighth-ave and Thirty-seventh-st., delivered a humorous lecture in the poetic style, entitled the "Aimighty Dollar," at the above place has evening. The room was filled by an attentive audience, who frequently manifested their appreciation of the lecturer's effort in carnest appliance. The proceeds of the affair were for the benefit of the Church. A bright gold dollar was displayed, suspended to a gas-fixture, which Mr. Stewart affirmed was a dollar. Then personating the coin, he gave a discourse in rhyme upon the part it played in the drama of life, from its virgin source in the quartz vens of California to the miners' hands, thence to the mint, and through many channels of trade, and in fact every point of its mission. The lecture abounded with allusions of both a sober and witty nature, to the many traits of human nature that are touched and colored by the almighty dollar's reflections.

Mr. Henry G. De Forest delivered an inter-Mr. Henry G. De Forest delivered an interesting lecture on the Roman Catacombs, instrught, in the Alexander Chapel, Nos. 7 and 9 king st. The catacombs are tortuous, devieus passages, crossing and recrossing interminably underground, without a ray of light unless you have it yourself. The affecting story of the artist Antonio and his little boy, who were providentially saved from being lost in the catacombs, was narrated. The period of St. Paul's coming te Rome, in the reign of Nero. A. D. 64 or 65, was about the time when the catacombs first began to be interesting to the Christian Church. Rome is underhaid by a soft rock, from which Roman cement was made. This was dog out, for the sake of that coment, in the progress of building the city. Such was the origin of those subterranean excavations, which were afterward used for burial places and for meeting purposes by the Caracians. A series of pictures illustrating the inscriptions and symbolical devices which are found in the catacombs were exhibited. The fish which is so often found sculptured in the catacombs means Christ. The chapel was well filled with an appreciative audience, including the pupils of the Sanday-school.
